

ABSTRACT

The present invention relates to a conjugate that comprises a) at least one compound to be delivered into or across a biological carrier, b) a delivery-enhancing transporter comprising at least 4 β -homolysine residues, especially between 4 and 25 β -homolysine residues, c) optionally a linker between the components a) and b), and d) optionally a labelling unit; to the salts of such conjugates; to a pharmaceutical composition comprising said conjugate; to a method for delivery of a compound into or across a biological barrier, the method comprising contacting the barrier with said conjugate; and to a process for the preparation of certain conjugates.
